 Laid Open: June 3, 1994  
 → Patent No. 2548074 (Reference A)  
 Patentee: Rhone-Poulenc Chimie

Claim 1:

"An aqueous easily-flowable cosmetic formulation containing water-insoluble particles in a suspended state, characterized by further containing at least one anionic surface active agent, at least one nonionic or ampholytic surface active auxiliary and at least one electrolyte, said surface active agent or active auxiliary being present in such an amount that said formulation has pseudoplastic behavior at a yield point of 0.2 Pa or more and exhibits lamellar phase structure where spherulites capable of retaining said particles stably and uniformly in a suspended state are enclosed."

② Application No. Hei 2(1990)-190583

 Laid-Open Patent Publication No. Hei 3(1991)-284619  
 Laid Open: December 16, 1991  
 → Patent No. 297336? (Reference C)  
 Patentee: Asu Seiyaku K.K.

Claim 1:

"A bathing composition characterized by containing 1 to 30% by weight of an anionic surfactant represented by the following general formula (1) and 1 to 30% by weight of an amide-type betaine surfactant represented by the following general formula (2), the blending ratio of said anionic surfactant to said amide-type betaine surfactant being from 1/9 to 3/7:

wherein R1 and R2 denote a saturated aliphatic hydrocarbon radical having a total of 9 to 18 carbon atoms; and M1 denotes a triethanolamine salt, sodium salt or ammonia salt."

Abstract (Basic): FR 2694494 A

A liq. aq. cosmetic compsn. contains suspended water-insol. particles, an anionic surfactant, a nonionic or amphoteric co-surfactant, and an electrolyte, with the amts. of surfactant such that the compsn. has pseudoelastic behaviour with a flow threshold of at least 0.2 Pa and a lamellar phase structure including spherulites which can keep the particles in stable and uniform suspension.

Pref. the particles are 0.5-8% of solid particles, esp. Zn pyrrithione or natural or synthetic abrasives, with size 1-600 microns, or emulsified droplets, of size 0.5-50 microns, of a vegetable, essential or silicone oil, pref. polyalkylsiloxane and/or polyalkylarylsiloxane.

ADVANTAGE - Use of thickeners is avoided. The compsn. is not viscous, is stable during prolonged storage, has good wetting and foaming capacity, and does not affect the skin or eyes.
